PREPARING FOR TECH INTERVIEWS??? – AMANDA PRISCILLA

- Suggestion 1:
- I found and took this course called Technical Interview at Udacity. It provides a quick review of algorithms and Data Structures, including a real tech interview in the end step-by-step! It is worthy to check it out, and it is free! ;)
- <https://br.udacity.com/course/technical-interview--ud513/>
- Udacity also has other intermediate course for Algorithms and Data Structures in case you want a deeper overview in this subject..
- <https://br.udacity.com/course/intro-to-algorithms--cs215/>
- And this advance course about complexity and Algorithms:
- <https://br.udacity.com/course/computability-complexity-algorithms--ud061/>

PREPARING FOR TECH INTERVIEWS??? – AMANDA PRISCILLA

- Suggestion 2:
- Site for mockup interviews with other users (peers matched based on availability). <https://www.pramp.com/>
- Practice sessions last 60 minutes: both you and your peer interview the other for 30 minutes each.
- Before the interview, each user gets a question to use for interviewing the other.
- The question you'll be asked won't be available to you prior to the interview itself. After the interview is over, you'll be able to review it on your dashboard.
- After each interview, interviewers and interviewees provide feedback for each other. You use this feedback to improve on your next interview session.
- Everything is 100% free.
